PHYS 180 Peer Mentor
Zoe Haynes

zhaynes@sdccd.edu

Major: engineering physics

Hi friends! My name is Zoe Haynes.

Fall 2020 will be the start of my 2nd year at Mesa, and 2nd semester peer mentoring for Mechanics. I'm 19 years old and a San Diego native. Some things I love to do are hiking, yoga, dancing, and travelling.

I started out as a kinesiology major, but after I realized my love for math and physics and met some cool engineering majors I decided to switch.

After Mesa I plan to transfer to UCSD, and I'm still undecided on whether I want to go to grad school or enter the workforce after I graduate. I am leaning towards grad school, because I've really loved peer mentoring and I think it would be super cool to study physics or engineering more and possibly be a professor one day!

Mechanics was a fun and challenging class, and the peer mentoring sessions really helped me understand the concepts on a deeper level and meet some great study buddies. Obviously, it's been a little different on Zoom, and when we switched, I wasn't getting as many students attending my sessions. I hope that changes this semester, because even remotely, peer mentoring is a great resource for extra help! I look forward to meeting you all this year!
